

Language Editor: Max Doherty

To the members of the World Journal of Gastroenterology Editorial Board,

I have read and edited the manuscript "Predictors for failure of stent treatment for benign esophageal perforations – a single center 10-year experience".

I have worked as a professional translator and proof-reader for the past five years. My clients include the Swedish National Board of Health and Welfare, and the Swedish Association of Local Authorities and Regions. I can verify that this manuscript is free of grammatical errors and spelling mistakes.

Yours sincerely,

Max Doherty
