Discussion

Postpartum psychiatric disorders can be divided into three categories: postpartum blues; postpartum psychosis and postpartum depression.<sup>1,2</sup> Postpartum blues, with an incidence of 300–750 per 1000 mothers globally, may resolve in a few days to a week, has few negative sequelae and usually requires only reassurance.<sup>1</sup> Postpartum psychosis, which has a global prevalence ranging from 0.89 to 2.6 per 1000 births, is a ...
