Neutrophil to lymphocyte ratio (NLR) as a prognostic ... [翻译此页](#)

Author: Jie Ni, Hongye Wang, Yue Li, Yimei S...

Publish Year: 2019

位置: 8600 Rockville Pike, Bethesda, MD

2019-11-15 · Neutrophil-to-lymphocyte ratio (NLR) has been reported to serve as a prognostic marker in inflammatory diseases. The purpose of this study was to evaluate the association of NLR at admission with in-hospital mortality in patients with sepsis presenting to emergency department.

Neutrophil, lymphocyte and platelet ratio as a predictor of mortality in septic-acute kidney injury patients
Relación entre neutrófilos, linfocitos y plaquetas como factor pronóstico de mortalidad en pacientes con lesión renal aguda por sepsis

<https://www.sciencedirect.com/science/article/pii/S0211699519302139>

Urine microscopy and neutrophil lymphocyte ratio are ... [翻译此页](#)

In our study, neutrophil lymphocyte ratio was a significant and an independent predictor of acute kidney injury. NLR had a cut off value of 4.2 with an area under the curve of 0.704 (95% CI: 0.574–0.835) having the maximum sensitivity and specificity of 72.1 and 65.9 respectively to predict AKI in patients with UTI.

The role of inflammation in **acute kidney injury** and end-stage **kidney** disease (ESKD) is well-recognized . Neutrophil–lymphocyte **ratio** (NLR) is a surrogate marker of inflammation and has been widely studied in malignancies [4–6], hypertension, heart diseases and vascular diseases [7 , 8].

Neutrophil/lymphocyte ratio (NLR) is a promising marker of inflammation. This study assessed if NLR could predict postoperative atrial fibrillation and acute kidney injury after **cardiac surgery**. Methods: A retrospective review of patients undergoing first-time on-pump cardiac surgery was performed.

There is growing evidence that increased inflammation leads to greater complications and poorer outcomes for patients post cardiac **surgery**. Neutrophil/lymphocyte **ratio** (NLR) is a promising marker of inflammation. This study assessed if NLR could **predict** postoperative atrial fibrillation and **acute kidney injury after cardiac surgery**.
