SPECIFIC COMMENTS TO AUTHORS

Very nice paper, there is one major concern about the study: death of the patient was exclusion criteria-why? On my opinion they should be included in the study. Otherwise there are some language mistakes and some unnecessary sentences, maybe another check to remove them.

SPECIFIC COMMENTS TO AUTHORS

Authors have analyzed data regarding the incidence and prediction of infection recurrence following successful minimally invasive treatment in IPN patients. Well analyzed data. But, only 13 patients had recurrent infection (small sample size). Table 4 and 5 can be combined. Introduction and methods could be more concise.
