2016-3-3 · Background and study aims: Endoscopic ultrasound (EUS)-guided fiducial marker placement for image-guided radiation treatment (IGRT) is becoming more widespread. Most case series report the procedure performed using fluoroscopy for spatial geometry although the benefits of this are unclear.

EUS-Guided Fiducial Placement - ResearchGate 翻译此页

While endoscopic ultrasound (EUS)-guided fiducial placement is technically feasible, its role in the delivery of image-guided radiation therapy (IGRT) is unclear.
