This paper describes the clinical course of suspected small gastrointestinal stromal tumors (GIST) in the stomach. I enjoyed reading this paper. I think the authors discussed precisely and their interesting results will provide useful information for gastroenterologists. <Comments> 1. In Fig.1, the word “Unknow” may be wrong. Please confirm.

#### **SPECIFIC COMMENTS TO AUTHORS**

I appreciate the work done by the Authors. The topic is Worth of interest and limitations of the study have been discussed. I would only ask to add some comments regarding the use and the role of EUS, since considering the huge time span of the series, only a minority of the cases underwent this evaluation.

#### **SPECIFIC COMMENTS TO AUTHORS**

I read the answers carefully. I probably did not explain what I thought was useful to add in the discussion or I did not understand the response of the Authors. However, I do not object to publication if the Editor agrees.
