Exosomal Annexin A2 Promotes Angiogenesis and Breast ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5215956>

Annexin A2 (AnxA2) is a Ca²⁺-dependent phospholipid-binding protein associated with the plasma membrane and the endosomal system. AnxA2 is up-regulated in breast cancer and implicated in many cancer-associated functions, including **plasminogen activation**, **actin-cytoskeletal rearrangement**, **cellular migration**, **adhesion**, and proliferation .
