**Portal hypertension in a case with biliary hamartomas: A case report**

Li QQ *et al.* BH

Qian-Qian Li, Xiao-Zhong Guo, Hong-Yu Li, Xing-Shun Qi

## BACKGROUND

Biliary hamartomas (BH) are a rare benign disease caused by malformation of the intrahepatic bile ducts. BH are occasionally diagnosed, but often lacking obvious clinical symptoms. They are usually diagnosed by biopsy and imaging tests in clinical practice. Few studies have reported the association of BH with portal hypertension.

## CASE SUMMARY

A 40-year-old man was repeatedly admitted to our hospital due to hematochezia. The source of bleeding was considered as gastroesophageal

## Case Report: Portal Hypertension Secondary to Isolated ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3391043>

Jul 01, 2012 · Conclusion. We have reported a case in which isolated hepatic TB caused portal hypertension and gastrointestinal bleeding mimicking some of the clinical and pathologic features of hepatic schistosomiasis. In endemic areas, TB should be considered in the differential diagnosis of non-cirrhotic portal hypertension.
