Kannikar Wechkunanukul, Daya Ram Parajuli, Mohammad Hamiduzzaman

**Abstract**

## BACKGROUND

Hypertension or high blood pressure is considered as a significant contributor and risk factor to many serious conditions, approximately 1.13 billion people have hypertension globally. However, the integrated technologies can upscale health provisions and improve the effectiveness of the healthcare system. WHO has recommended that the Digital Health Interventions (DHI) and the Health System Challenges should be used in tandem in addressing health.
