

## ANSWERING REVIEWERS

October 18, 2013

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 5441, revision.doc).

**Title:** Metabolic consequences of Helicobacter pylori infection and eradication

**Author:** György Miklós Buzás

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO:** 5441

The manuscript has been improved according to the suggestions of reviewers:

**Reviewer 00159159**

Thank you for your comments. The language errors in the abstract, core tip and manuscript. In Table 1, references were entered under individual findings

**Reviewer 00058436**

Thank you for your suggestions and comments. The manuscript was revised carefully and typing errors were deleted/corrected. All abbreviations were written in a consistent form. RP = proliferative retinopathy.

**Reviewer 00058667**

Thank you for review. A new paragraph concerning the multifactorial nature of metabolic syndrome was inserted. I certainly do not expect a major decrease in the prevalence, profile and natural course of cardiovascular diseases and metabolic syndrome from H. pylori eradication, however, there are no parallel studies investigating the epidemiology of these conditions in different population.

Sincerely yours,

Peter Laszlo LAKATOS, MD, PhD
