SPECIFIC COMMENTS TO AUTHORS

The article is well written and refers the results of a very valuable and interesting study. Methods and implementation are adequate. Some mention to the questionable rationale of the studies claiming nafld as an independent risk factor for cvd events and death may be useful for the reader.

SPECIFIC COMMENTS TO AUTHORS

This is an interesting study that evaluated CVD in NAFLD patients. The methodology is adequate however the authors need improve the results add beyond tables , figures to illustrate better the results. An the authors need improved discussion because there are a lot of published papers about NAFLD as a risk of CVD independently.
