#### **SPECIFIC COMMENTS TO AUTHORS**

In this manuscript, the authors perform a rare and interesting case of gastrointestinal epithelioid angiosarcomas. Concerns: 1. How can the authors make sure the primary lesions were gastrointestinal tract? Was it possible that epithelioid angiosarcomas originate from lymphnodes or bones and metastasize to gastrointestinal tract? 2. Is it a colon lesion biopsy? How to make sure of the pathology result of lesion of gastric body? 3. ANA and anti-SSA of this patient was positive. Did it have any significance? 4. Is there any data about the morbidity of gastrointestinal epithelioid angiosarcomas indicating it's really rare? Where are the predilection site of epithelioid angiosarcomas? 5. It is suggested to list manifestation of each picture in Figure 4. 6. It is suggested to point out the significance to help clinicians from this case.
