SPECIFIC COMMENTS TO AUTHORS

This review is generally comprehensive and well-written. Comment 1. The title "HBV recurrence after liver transplantation in the third millennium: an old tale or a clear and present danger?" does not match the review quite well. I cannot see the in-depth perspectives on this issue which shed light on the third millennium. The paragraphs (Page 8-10) which tried to illustrate this topic is mostly history review and also lack of future perspective. I wonder if this review content deserve its name. 2. Ref 94 in Figure 1 is actually ref 84? 3. Figure 1 seems unnecessary. 4. I would suggest a subtitle for each paragraph to provide readers a quick summary what's the current status and future perspectives.

SPECIFIC COMMENTS TO AUTHORS

1. Historical aspects could be shortened. 2. The trial for the active vaccination had better be addressed in one section. 3. Please refer to recent NA, TAF (tenofovir alafenamide), in the association with the use for the prevention of HBV recurrence after LT.
