Dear Sir/Madam

We appreciate the time and effort that You have dedicated to provide valuable feedback on our manuscript titled: "Demyelinating polyneuropathy and lymphoplasmacytic lymphoma coexisting in 36-year-old man: a case report" by Lesia Rozlucka et al. We are grateful for Your insightful comments on our paper. We have been able to incorporate changes to reflect most of the suggestions. We have included responses to suggestions 1-2 in the discussion and 3 in the introduction. Regarding 4th point: in our opinion hypothyroidism was a concomitant disease, not directly associated with CIDP and LPL, therefore we did not discuss this matter in the manuscript. Please find the changes highlighted within the manuscript.

Sincerely yours,

Lesia Rozlucka on behalf of all the authors.
