SPECIFIC COMMENTS TO AUTHORS

This systematic review fails to define a therapeutic diagnostic behavior. The failure is due to the little and heterogeneous information of the papers consulted. The paper is of interest since the presented pathology is infrequent, it represents a diagnostic and therapeutic challenge and the personal opinion of the authors in this sense would improve the quality of their work.

SPECIFIC COMMENTS TO AUTHORS

The authors summarized 14 cases of hydatidosis related duodenal injury. Actually, the focus of this summary is too specific to be considered in this journal and should be submitted to the journal related to the zoonosis.
