

February 28, 2020.

To whom it may concern,

I, Mirza Rojas, have provided proof-reading and editing services to Dr. Lenin Pavon and colleagues to ensure that the manuscript entitled “**Circulatory levels of MCP-1, MIP-1a, MIP-beta, IL-8, IP-10, and eotaxin in SRRI-treated adolescent MDD patients throughout eight-week clinical follow-up**” submitted to your journal is suitable for publication and requires no further editing.

Please, contact me if there is need for additional information,

A handwritten signature in black ink, appearing to read 'Mirza Rojas', with a stylized flourish at the end.
