

ASC

**Supplementary Figure 1 Adipose-derived stem cells were labeled for CD 45, CD90, CD73 and CD105 markers.** The expression of these surface molecules was measured by cytofluorometry. This figure is representative of 3 analyses. ASC: Adipose-derived stem cells; CD: Cluster of differentiation; FITC: Fluorescein isothiocyanate; PE: Phycoerythrin; APC: Allophycocyanin.
