SPECIFIC COMMENTS TO AUTHORS

The manuscript (02731847) entitled "Primary Sclerosing Cholangitis and Autoimmune Hepatitis Overlap Syndrome associated to Inflammatory Bowel Disease: Case Report and Systematic Review" is by Ballotin et al. This is a case report and systematic review. The authors reported a case of a female patient with Autoimmune Hepatitis (AIH) and Primary Sclerosing Cholangitis (PSC) Overlap Syndrome associated to Ulcerative colitis and to systematically review the available cases of AIH and PSC overlap syndrome. They analyzed, 108 cases reported in 44 references. They concluded that PSC and AIH overlap syndrome is generally associated to inflammatory bowel disease and is associated to a low mortality and a good response to treatment. Main comments 1. Some language editing is needed. For example, in the second paragraph on page 6/53, "gamma-glutyl transferase.." should be "glutamyl". 2. Please define abbreviation before using them. For example, "GGT" was not define in this manuscript. 3. Please discuss and evaluate the treatment strategies that help the patients the most if possible.

SPECIFIC COMMENTS TO AUTHORS

This article report a Case of Primary Sclerosing Cholangitis and Autoimmune Hepatitis Overlap Syndrome associated to Inflammatory Bowel Disease and Systematic Review on the disease. The result is helpful for clinical practice. I have a little suggestions: 1) In the paragraph of abstract, it should add the content of the case. 2)In the study, there is no data that need to analyze using “the t-test, chi-squared and Wilcoxon test”. 3) In the last summary, author suggest “In more severe cases, liver transplantation can be performed.” please give the clinical evidence or reference.

In the Research perspectives of Article highlights, please correct "hghly" in the first sentence. In addition, abbreviations like " Hb: hemoglobin. Ht: Hematocrit" may not be needed. These abbreviations do not help the readers and could not save space either.

Dear authors, There are some error in manuscript. In 'core tip' section you mentioned that 'She had negative auto-antibodies' but in case report section you report that 'She had a reagent antinuclear factor (1:640, with a homogeneous nuclear pattern)' You have to check manuscript for language. There are some spelling error.
