To: Nazmul Haque
Faculty of Dentistry

Dear Mr. Nazmul Haque,

Research Proposal entitled "Peripheral Blood mononuclear cell derived secretome-mediated migration of leukocytes and dental pulp stem cells by activationg HMGB1-SDF1-CXCR4 signaling pathway"(RP158-05/19)

We are pleased to inform you that your MAHSA grant application has been successful. A starting grant of **RM 33,000.00** has been allocated for your research. This amount will be reviewed on a regular basis. You can start your research work beginning 1 June 2019.

The following are standard requirements attached to approval of all projects:

1. You are required to submit purchase requisition to the Purchasing Department to acquire items approved in the budget.
2. You must notify the Committee in writing regarding any alteration to the project.
3. You are required to submit a research progress to the RMC every 6 months after commencement of the project.
4. It is also desirable and highly recommended that you publish a literature review of your study within 6 months of starting the project. This will bring you credits to your future research project.

Thank you.

Yours sincerely,

.....
Professor Dr. Zabidi Hussin
Director of Postgraduate Studies, Research & Innovation
