World Journal of Gastroenterology,

Dear Editor,

This is a letter to support the quality of the English language in the manuscript "Detection of Gastroesophageal Reflux Disease and Symptom Association in Children with Esophageal Atresia by Combined Video, Multichannel Intraluminal Impedance and pH Study (Video MII-pH)." by Palittiya Sintusek.

As a staff of Chulalongkorn University English editing service, I would like to reassure that I have edited the English language in this manuscript and it is proper for the publication in the international journal.

Sincerely yours,

Mano Laohavanich
