***Editorial Office's comments***

***Science Editor***

1. Self-citations have been introduced in the manuscript, since the subject of the manuscript is related to the investigations carried out by our team. The reference number is 42

2. The English language has been reviewed by an English speaking professional. The certificate is attached to the submission of the manuscript
3. The author's information has been added
4. Key word's has been added
5. Core tip has been added
6. Author's contributions have been added
7. The original pictures of the figure have been added
8. PMID and DOI numbers have been provided
9. The references have been formatted as the recommendation of the editors

### ***Scientific quality***

The manuscript has been reviewed

A new section about metabolic healthy obesity and obesity paradox has been edited

Several latest clinical trials have been introduced in the tables

A new table of the mineralocorticoid receptor antagonist has been added. We have tried to reflect a resume of the newest clinical trials which are going on or have been completed
