Coronavirus (COVID-19) symptoms

Symptoms of COVID-19 include cough, shortness of breath, difficulty breathing, or at least two of the following symptoms: chills, shaking with chills, muscle pain, headache, sore throat, and loss of taste or smell. Symptoms can range from mild to severe and may appear up to two weeks after exposure to the virus, according to the CDC. Some people with COVID-19 don't display any symptoms.

Seek medical attention if you experience serious symptoms such as trouble breathing or pain or pressure in the chest.
