SPECIFIC COMMENTS TO AUTHORS

I read with interest this manuscript by Zhang and co-workers. The authors performed a good description of the case and review of literature. The work was conducted with a good methodology and it carries some interesting results.

SPECIFIC COMMENTS TO AUTHORS

This is a well written case. I just have minor suggestions. 1. The term lithotripsy should to my opinion be changed for endoscopic fragmentation 2. Line 161: "upper GI endoscopy" rather than "gastroscopy" 3. Line 203: "indigestible fibres (cellulose, hemicellulose, tannin and lignin) from vegetables and fruits" 4. Line 209 I would suggest to supress ", and the lack of an acidic environment prevents the formation of bezoars".
