The Heart Failure with Preserved Ejection Fraction ...

<https://link.springer.com/article/10.1007/s11897-020-00454-2> ▾

Feb 28, 2020 · Heart failure with preserved ejection fraction (HFpEF) or diastolic heart failure (DHF) makes up more than half of all congestive heart failure presentations (CHF). With an ageing population, the case load and the financial burden is projected to increase, even to epidemic proportions. CHF hospitalizations add too much of the financial and infrastructure strain.

Forensic interrogation of diabetic endothelitis in cardiovascular diseases and clinical translation in heart failure

Thomas MC *et al.* Diabetic endothelitis and HFpEF

Merlin C Thomas, Pupalan Iyngkaran

Abstract

Diabetic heart disease (DHD) can be classified as a primary consequence from several pathophysiological manifestation of diabetes mellitus (DM) on cardiac tissues or secondarily in extracardiac tissues and is encountered as either primary or secondary complications of DM. Endothelitis is inflammation of the vascular endothelium and is likely to be seen in the majority of patients who

Basic Mechanisms of Diabetic Heart Disease | Circulation ...

<https://www.ahajournals.org/doi/10.1161/CIRCRESAHA.120.315913>

Diabetes mellitus predisposes affected individuals to a significant spectrum of **cardiovascular** complications, one of the most debilitating in terms of prognosis is **heart failure**. Indeed, the increasing global prevalence of **diabetes** mellitus and an aging population has given rise to an epidemic of **diabetes** mellitus–induced **heart failure**.
