#### **SPECIFIC COMMENTS TO AUTHORS**

I suggest this paper to be published without revision because the fact that the type of this manuscript is "opinion review" and it is not scientific paper per se. Classic review approach is therefore inapplicable in this case. That said, presented manuscript opens an important topic for further discussion and points out possible directions for future research. Formally it is divided into 3 parts: introduction, main message and conclusion with 69 references, citations are done right.
