To whom it may concern,

The manuscript entitled "Brain tumors: cancer stem-like cells interact with the microenvironment" has been carefully re-read by Dr. Jahnsn Nicololus, the postdoctoral associate in University of Pennsylvania.

The issue about interacting between cancer stem stems and niche components is important to be understood deeply in the field of cancer research. This review especially discussed the clinical application in the terms of targeting the microenvironment and emphasized the critical role of scRNA-seq technology in studying the heterogenicity of tumor microenvironment.

If you have any question, don't hesitate to contact me.

Best wishes!

Jahnsn Nicololus
