## Effectiveness and safety of sofosbuvir plus ribavirin for ... 翻译此页

Cited by: 27

Author: Eiichi Ogawa, Norihiro Furusyo, Hideyuki ...

Publish Year: 2016

2016-12-1 · Older patients with chronic hepatitis C virus (HCV) infection have historically been designated difficult-to-treat. We evaluated the efficacy and safety of sofosbuvir (nucleotide NS5B polymerase inhibitor) plus ribavirin for patients with HCV genotype 2 infection in a real-world clinical setting, with the focus on elderly patients aged  $\geq 65$ .

## Direct-acting antivirals for HCV treatment in older ... 翻译此页

Data on genotype 2 HCV patients over 65 years were very limited and included in only one RCT with 25 patients treated with sofosbuvir/velpatasvir and an SVR of 100%. 11. Only one open-label phase 3 study included genotype 3-infected patients: Seven were treated with sofosbuvir/velpatasvir and 14 with sofosbuvir plus ribavirin.

### [Safety, Tolerability, and Efficacy of Sofosbuvir Plus ...](#)

<https://www.ncbi.nlm.nih.gov/pubmed/27750230>

Key Messages: The combination of **sofosbuvir plus RBV** is **tolerable and beneficial in patients aged >75**. However, intensive management of anemia by **dose reduction of RBV** is necessary, which could lead to a low SVR12 rate compared to that observed in **patients** younger than **75** years.
