## Accelerating the elimination of viral hepatitis

<https://www.thelancet.com/commissions/elimination-of-viral-hepatitis>

Jan 08, 2019 · With the advent of highly effective prevention measures and treatments, global **elimination** of viral **hepatitis** is a realistic goal; all WHO member states have committed to a global reduction in **hepatitis**-related deaths by 65% and new infections by 90% by 2030.

## Accelerating the elimination of viral hepatitis: a Lancet ...

[https://www.thelancet.com/journals/langas/article/PIIS2468-1253\(18\)30270-X/fulltext](https://www.thelancet.com/journals/langas/article/PIIS2468-1253(18)30270-X/fulltext)

Viral **hepatitis** is a major public health threat and a leading cause of death worldwide. Annual mortality from viral **hepatitis** is similar to that of other major infectious diseases such as HIV and tuberculosis. Highly effective prevention measures and treatments have made the global **elimination** of viral **hepatitis** a realistic goal, endorsed by all WHO member states.

Hasan F *et al.* Elimination of HCV in Kuwait

Fuad Hasan, Ahmad Alfadhli, Abeer Al-Gharabally, Mahmoud Alkhaldi,  
Massimo Colombo, Jeffrey V Lazarus

## Abstract

Hepatitis C virus (HCV) is estimated to affect 71 million people worldwide. In 2016, the World Health Organization adopted the first global health sector strategy to eliminate viral hepatitis as a public health threat by 2030. In December 2018, the European Association for the Study of the Liver, International Liver Foundation convened an expert panel to address the elimination of HCV infection in Kuwait. Several steps have already been taken
