SPECIFIC COMMENTS TO AUTHORS

The authors have presented an interesting case. However, the following points need to be looked into. 1. The case report should be in paragraphs without so many subheadings as it distracts the reader. 2. The lesion could be an ulcer as well within the diverticulum. Any other imaging done to prove that this is an aberrant vessel would be more useful. 3. Do not use abbreviations like IV. Use full forms eg. intravenous.

SPECIFIC COMMENTS TO AUTHORS

-Title: there is a mistake in "Dieulafoy`s`s" -Taking into consideration the size of the showed artery in figure 3, it could be argued that one of the clips is not in a right location.
