**TFE3-expressing malignant perivascular epithelioid cell tumor of the mesentery: A case report and review of literature**

Nah Ihm Kim, Ji Shin Lee, Yoo Duk Choi, U Chul Ju, Jong Hee Nam

## Abstract

### BACKGROUND

Perivascular epithelioid cell tumor (PEComa) is a rare mesenchymal tumor that exhibits an epithelioid and spindle cell morphology. The tumor is characterized by

## TFE3-expressing primary perivascular epithelioid cell ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6599445>

We report a rare case of **TFE3-expressing primary LN PEComa** that mimicked nodal recurrence of **rectal cancer**. Thus, imaging results in patients affected by neoplasm present a clinical diagnostic dilemma, as the presence of newly onset PEComa of LN may lead to the **erroneous diagnosis of tumor recurrence** or progression.

## Malignant perivascular epithelioid cell tumor arising in ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4467325>

Introduction. Primary **tumors** arising from the **mesentery** are rare. The incidence of primary lesions among **mesentery** neoplasms is ~1%; for instance, in a previously-conducted review of a large series of patients with **mesenteric** abnormalities detected using CT, only one **case** was determined to be a primary **tumor** (). **Perivascular epithelioid cell tumors** (PEComas) are a recently-defined ...
