3 Revision has been made according to the suggestions of the reviewer.

(1) Reviewer 00289422

a. Foreign bodies seen in figure 2 and figure 3 were labeled with arrow tips.

(2) Reviewer 00289422

a. The abstract was structured in purpose, materials-methods, results and conclusion.

b. The foreign body detected with physical examination in the 7 patients was seen figure 1.

c. Our emergency department only handles adult cases; therefore our study was limited to patients >16 years-old and we were not able to provide any information regarding the pediatric age group. However, we discussed the role of ultrasonography in diagnosis of foreign bodies in pediatric patients in the discussion section.

d. Most of repeated the numbers and percentage were removed in the discussion part of the study.

e. All references was numbered in the order they appear in the text.
