Stem cell therapy for COVID-19 and other respiratory diseases: Global trends of clinical trials

Ji HL *et al.* Cell therapy for lung diseases

Hong-Long Ji, Cong Liu, Run-Zhen Zhao

Abstract

Respiratory diseases, including coronavirus disease 2019 and chronic obstructive pulmonary disease (COPD), are leading causes of global fatality. There are no effective and curative treatments, but supportive care only. Cell therapy is a promising therapeutic strategy for refractory and unmanageable pulmonary illnesses.
