

PEER-REVIEW REPORT

Name of journal: World Journal of Stem Cells

Manuscript NO: 56477

Title: Stem Cell Therapy for COVID-19 and Other Respiratory Diseases: Global Trends of Clinical Trials

Reviewer's code: 05385069

Position: Peer Reviewer

Academic degree: PhD

Professional title: Postdoctoral Fellow, Professor

Reviewer's Country/Territory: Iran

Author's Country/Territory: United States

Manuscript submission date: 2020-05-01

Reviewer chosen by: AI Technique

Reviewer accepted review: 2020-05-01 20:44

Reviewer performed review: 2020-05-02 03:27

Review time: 6 Hours

Scientific quality	[<input checked="" type="radio"/>] Grade A: Excellent [<input type="radio"/>] Grade B: Very good [<input type="radio"/>] Grade C: Good [<input type="radio"/>] Grade D: Fair [<input type="radio"/>] Grade E: Do not publish
Language quality	[<input checked="" type="radio"/>] Grade A: Priority publishing [<input type="radio"/>] Grade B: Minor language polishing [<input type="radio"/>] Grade C: A great deal of language polishing [<input type="radio"/>] Grade D: Rejection
Conclusion	[<input checked="" type="radio"/>] Accept (High priority) [<input type="radio"/>] Accept (General priority) [<input type="radio"/>] Minor revision [<input type="radio"/>] Major revision [<input type="radio"/>] Rejection
Re-review	[<input checked="" type="radio"/>] Yes [<input type="radio"/>] No
Peer-reviewer statements	Peer-Review: [<input type="radio"/>] Anonymous [<input checked="" type="radio"/>] Onymous Conflicts-of-Interest: [<input type="radio"/>] Yes [<input checked="" type="radio"/>] No

SPECIFIC COMMENTS TO AUTHORS

First, the original finding of this manuscript is a potential use of stem cell therapy in COVID-19. the new hypotheses that this study is that we can focused on stem cell therapy because it can be a best therapy with lowest side effects. the new phenomena that were found through experiments in this study are all clinical details in stem cell therapy in covid-19. the hypotheses that were confirmed through experiments in this study is stem cell therapy in lung destruction diseases. Second the quality and importance of this manuscript is excellent. the new findings of this study is to be cover of practical use of stem cell in covid-19. the new methods that this study proposed are release to all practical procedures to it usage. the conclusions appropriately summarize the data that this study provided are best. the unique insights that this study presented. the key problems in this field that this study has solved is stem cell therapy method in covid-19 therapy. Third, the limitations of the study are clinical trial procedures in all stage over 3. the future directions of the topic described in this manuscript is good. the questions/issues that remain to be solved its completely trial in clinical forms and details. This report can be a impressive impact to change of covid-19 therapeutic procedures in all of world.
