Endoscopic submucosal dissection of gastric ectopic pancreas

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3796718>

The **endoscopic** picture of the **heterotopic pancreas in the stomachs wall** has been described as an elevated **delomorphic submucosal tumor** that has a normal mucosa over it with characteristic central umbilication . In some patients the **endoscopic picture** is not that specific, e.g. there is a lack of the central umbilication like in the present case and the tumor might be misinterpreted for GIST or another ...
