#### **SPECIFIC COMMENTS TO AUTHORS**

Olivia Engholt Mortensen and colleagues aimed to explore the feasibility of fluorescence endoscopy and evaluate its use in diagnosing and evaluating gastrointestinal disease. And they found that the use of fluorescence endoscopy was a promising method adding precisely diagnostic value in the early development of neoplasms and tumors, adenomas, assessment of tumor invasion within the gastrointestinal tract and adding therapeutic value within the field of gastrointestinal diseases. I think the review is useful and helpful. Furthermore, no obvious errors were found in this paper. I think this paper can be accepted.

## RE-REVIEW REPORT OF REVISED MANUSCRIPT
