

BPG Editorial Office  
World Journal of Clinical Cases  
Manuscript NO: 56603

To the Editor(s) and Reviewer(s):

Thank you for your insightful review and your conditional acceptance of our manuscript titled, "Small bowel obstruction caused by a bezoar following an adult simultaneous liver-kidney transplantation: A case report." The following are responses and revisions to particular comments requested by the editors.

---

**The "Author Contributions" section is missing Please provide the author contributions.**

Author contributions have been added to the section following the title page.

**The authors did not provide original pictures. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor**

Figures have been prepared as separate files and uploaded to the submission portal.

**PMID and DOI numbers are missing in the reference list. Please provide the PubMed numbers and DOI citation numbers to the reference list and list all authors of the references.**

PMID numbers has been added to references 1 and 17. The remaining references have specified DOI numbers. Additional authors have been added to references 2, 7, 8, 10, and 13.

**The "Case Presentation" section was not written according to the Guidelines for Manuscript Preparation. Please re-write the "Case Presentation: section, and add the "FINAL DIAGNOSIS", "TREATMENT", and "OUTCOME AND FOLLOW-UP" sections to the main text, according to the Guidelines and Requirements for Manuscript Revision.**

The Case Presentation section now has separate sub-categories of "Final Diagnosis", "Treatment", and "Outcome and Follow-Up." Additional text has been added to the "Final Diagnosis" and "Outcome and Follow-Up" sections.

**Please upload the primary version (PDF) of the Informed Consent Form (Surgical procedures or other) that has been signed by the patients in the study, prepared in the official language of the author's country to the system...**

Wednesday, June 10, 2020

The patient was not required to provide informed consent with respect to this case report because the manuscript utilized anonymous data that was obtained after the patient agreed to treatment by written consent. The University of Utah Institutional Review Board does not require informed consents for case reports. We have attached the patient's informed consent for the surgical procedure. All patient identifiers have been redacted in accordance with HIPAA.
