SPECIFIC COMMENTS TO AUTHORS

Recension of manuscript No. 57032: „ Solitary peritoneal metastasis of gastrointestinal stromal tumor: A case report, written by Yoichi Sugiyama, Kensuke Shimbara, Masaru Sasaki, Mohei Kouyama, Tatsuya Tazaki , Shinya Takahashi, Atsushi Nakamitsu“, which will be published in World Journal of Gastroenterology. The structure of manuscript is in keeping with the common required criteria. The topic of the work is very actual, because solitary peritoneal metastasis of gastrointestinal stromal tumor (GIST) is very rare. Appropriate treatment strategy has not been established. Authors reported a 76-year-old woman, who was diagnosed with stomach GIST and underwent laparoscopic local resection. As the recurrence risk was intermediate, adjuvant imatinib therapy was not administered. Two years after surgery, routine computed tomography revealed an abdominal mass between the dorsal side of the right hepatic lobe and right kidney. Laparoscopic observation showed that the tumor was located at the retroperitoneum, and intraperitoneal dissemination was not found. Therefore, the authors performed laparoscopic tumor resection. The patient was treated adjuvant imatinib therapy. There was no evidence of recurrence 3 years after the operation. Work is clearly legible, brings summarizes new knowledge. The citations are actual and their format respect usual standards. This is the first reported case of solitary recurrence GIST in the peritoneum that was treated with complete laparoscopic resection. The conclusion reflects the author's results and these can be accepted. I recommend the manuscript to be published. Kosice, 16. May 2020 MUDr. Jana Katuchova, PhD. Professor of Department of Surgery University Hospital Košice Slovakia
