Report of a Rare Case of Nasal Mucosa Pyoderma Vegetans ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4430790>

Nov 02, 2014 · Herein, we present a 36-year-old woman with **ulcerative colitis** and uncommon **nasal mucosa pyoderma vegetans**. The patient presented to our hospital with symptoms of **active colitis** and a concomitant 3×4×5 cm **dermato-mucosal lesion** in her left **nasal lumen**. After surgery of the **mucosal lesion**, the treatment for her active **colitis** was initiated with intravenous infliximab and oral asacol.

Report of a Rare Case of Nasal Mucosa Pyoderma Vegetans in a Patient with **Ulcerative Colitis**

ABSTRACT Some dermatologic manifestations are common in **ulcerative colitis (UC)**. Herein, we present a 36-year-old woman with **ulcerative colitis** and uncommon **nasal mucosa pyoderma vegetans**. The patient presented to our hospital with

Pyoderma

Pyoderma means any skin disease that is pyogenic. These include superficial bacterial infections such as impetigo, impetigo contagiosa, ecthyma, folliculitis, Bockhart's impetigo, furuncle, carbuncle, tropical ulcer, etc. Autoimmune conditions include pyoderma gangrenosum. Pyoderma affects more than 111 million children worldwide, making it one of the three most common skin disorders in children along with scabies and tinea.
