Subject
Submission: Metastatic pattern in esophageal and gastric cancer: influenced by site and histology (57199)

I, Dr. Rachel S van der Post, certify that for the manuscript entitled:

“Metastatic pattern in esophageal and gastric cancer: influenced by site and histology”

Patients were not required to give informed consent to the study because the analysis used anonymous data and this type of study does not require approval from an ethics committee under Dutch law.

This certificate is delivered to the concerned person for any purposes of which it may be required.
