

S. No.	Comments	Response
1.	<p>(1) In order to help more readers to find what they want to read in the shortest possible time, we have added a section known as ‘Article Highlights’ to every paper published by BPG journals; this section will appear before the References section. This new section will consist of summarized information on the research background, motivation, objectives, methods, results, conclusions, and perspectives; the subsections will be titled accordingly (e.g., Research background, Research motivation, etc.; see below).  <b>ARTICLE HIGHLIGHTS</b>  <b>Research background</b> The background, present status, and significance of the study should be described in detail. <b>Research motivation</b> The main topics, the key problems to be solved, and the significance of solving these problems for future research in this field should be described in detail. <b>Research objectives</b> The main objectives, the objectives that were realized, and the significance of realizing these objectives for future research in this field should be described in detail. <b>Research methods</b> The research methods (e.g., experiments, data analysis, surveys, and clinical trials) that were adopted to realize the objectives, as well as the characteristics and novelty of these research methods, should be described in detail. <b>Research results</b> The research findings, their contributions to the research in this field, and the problems that remain to be solved should be described in detail. <b>Research conclusions</b> The following questions should be briefly answered: What are the new findings of this study? What are the hypotheses that were confirmed through experiments in this study? What are the implications of this study for clinical practice in the future? <b>Research perspectives</b> What experiences and lessons can be learnt from this study? What is the direction of the future research? What is/are the best method/s for the future research?</p> <p>2) Please note that there should be no spaces between the numbers, so this should appear as[7,8]. As we do not use EndNote, any changes I make to the linked text will not be preserved. Therefore, please ensure to fix these spaces in your final draft of this document.</p> <p>3) Please check and confirm that there are no repeated references! Please add PubMed citation numbers (PMID NOT PMCID) and DOI citation to the reference list and list all authors. Please revise throughout. PMID (<a href="http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?db=PubMed">http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?db=PubMed</a>) (Please begin with PMID: ) DOI (<a href="http://www.crossref.org/SimpleTextQuery/">http://www.crossref.org/SimpleTextQuery/</a>) (Please begin with DOI: 10.***) Example: 1 Balistreri WF, Grand R, Hoofnagle JH, Suchy FJ, Ryckman FC, Perlmutter DH, Sokol RJ.
