#### **SPECIFIC COMMENTS TO AUTHORS**

The article entitled “Contemporary treatment approaches for metastatic colorectal cancer driven by BRAF V600 mutations’ by Kanat O et al. attempts to analyse the treatment options of metastatic colorectal cancer driven by BRAF V600 mutations. However, the article suffers from a narrative tone, improper use of abbreviations, and still some minor language issues in spite of the “English language editing” performed. please see some examples in the attached.

#### **SPECIFIC COMMENTS TO AUTHORS**

Major comments: 1. They should describe a little more about the immunotherapy because the sporadic MSI-high metastatic mCRC have a high proportion of BRAF mutations. 2. They should change “panitumumab” to “cetuximab” (Page 3, L4) 3. They may describe that the therapy of cetuximab and encorafenib will be approved by the FDA because the update analyses of the BEACON study was reported that efficacy of the combination of encorafenib plus binimetinib plus cetuximab and encorafenib plus cetuximab were similar in annual meeting of ASCO 2020 Minor comments: 1. I think that (n=12) are mistake and correctly (n=15). (Table1, Yaeger et al.).

## RE-REVIEW REPORT OF REVISED MANUSCRIPT
