#### **SPECIFIC COMMENTS TO AUTHORS**

This manuscript is a rare case report describing the hernioplasty for pelvic floor hernia treated with laparoscopic surgery with perineal approach. The highlight of this manuscript is that the combination of the biological mesh and pedicle skin flap with both laparoscopic and perineal approach was useful and safety procedure to estimate the orifice bidirectionally. I recommend that this paper would be accepted after minor revision. Minor comments: References “—” and “-“ were mixed in your references. Please corrects them. Page 7, Reference23.
