

1. Reviewer #1:

Scientific Quality: Grade C (Good)

Language Quality: Grade B (Minor language polishing)

Conclusion: Accept (General priority)

Specific Comments to Authors: The findings from this study will contribute positively to the existing literature and medical practice, therefore, I recommend publication.

Reply: Thanks for your comments very much.

2. Special requirements for references: Please provide the PubMed numbers and DOI citation numbers to the reference list and list all authors of the references.

Reply:

Thanks, we have updated and checked the reference list throughout the manuscript as required.

In the list, we did not find the DOI number of the first and eighth references and the PMID number of the seventeenth reference. We updated these references as follows:

1. National Kidney Foundation. K/DOQI clinical practice guidelines for chronic kidney disease: evaluation, classification, and stratification. *Am J Kidney Dis* 2002; 39: S1-266 [PMID: 11904577]

8. Bar J, Ben-Rafael Z, Padoa A, Orvieto R, Boner G, Hod M. Prediction of pregnancy outcome in subgroups of women with renal disease. *Clin Nephrol* 2000; 53: 437-444 [PMID: 10879663]

17. Mackay EV. Pregnancy and Renal Disease A Ten-Year Survey. *Australian and New Zealand Journal of Obstetrics and Gynaecology*. 1963;3:21-34. [DOI:10.1111/j.1479-828X.1963.tb00210.x]
