#### **SPECIFIC COMMENTS TO AUTHORS**

This manuscript presents a review of diagnosis and therapy for Hepatic epithelioid hemangioendothelioma. The appropriate treatment strategy for HEHE is very important for improving outcomes. This manuscript is clearly presented and the conclusions are hardly controversial. This is the greatest contribution this paper offers. However, the review on the most radical treatment, liver transplantation, is insufficient. The following report should be quoted. S. Fukuhara, et al. Hepatic epithelioid hemangioendothelioma successfully treated with living donor liver transplantation: A case report and literature review. 2020 Clinical Case Reports. I have enjoyed reviewing your manuscript, which is a very good contribution to the Review on World Journal of Gastroenterology.
