SPECIFIC COMMENTS TO AUTHORS

it is an interesting review. The authors should include some information regarding the IBS genetics and how genetics may influence the innervations. The authors should include relevant reviews ie Nat Rev Gastroenterol Hepatol. 2016 Feb;13(2):77-87

SPECIFIC COMMENTS TO AUTHORS

The manuscript entitled "Efficacy and Safety of Non-pharmacological Interventions for Irritable Bowel Syndrome in Adults" in the form of a literature review addresses a topic widely used in the clinical practice and therapy of patients with IBS. However, studies comparing pharmacological and non-pharmacological intervention in patients with IBS are scarce in the literature. The present study is an excellent contribution to the therapeutic topic of IBS, and provides a stimulus for conducting comparative studies of these therapeutic options.

SPECIFIC COMMENTS TO AUTHORS

This paper is a comparative study of pharmacological, non-pharmacological, and acupuncture treatments of IBS. Few papers on this topic are present. It is believed that this paper will assist readers in selecting treatment options for IBS.
