#### **SPECIFIC COMMENTS TO AUTHORS**

In this article, the authors reported a rare SFT case that metastasized to the chest wall. This manuscript provides us valuable information about malignant SFT, which makes this article suitable for publication.

### PEER-REVIEW REPORT

**Name of journal:** World Journal of Clinical Cases

#### **SPECIFIC COMMENTS TO AUTHORS**

**MAJOR STRENGTHS** 1. The text is relatively well-organized with logical formatting, and it is of appropriate length. 2. Authors have reported the first known case of intracranial malignant SFT metastasized to the chest wall; this case suggests the need for careful, detailed examination, and careful follow-up when encountering patients presenting with a mass. **MAJOR WEAKNESSES** 3. The references citations seem to be wrong. Please correct them. For examples, Solitary fibrous tumor (SFT) is a rare type of fibroblastic mesenchymal neoplasm that affects spindle cell soft tissues, demonstrating broad-spectrum biological behavior; it is ordinarily benign, and rarely known to metastasize [1,2,3,4,5,6,7]. -> [1-7]. 4. In history of past illness, what was the correct diagnosis of his brain tumor? Was there any relation with present brain lesions? Please clarify. 5. Plain head or chest CT -> Unenhanced or non-enhanced CT. 6. In discussion, it seems to be redundant. Please concise it.
