

Response to reviewers and science editor

3. The references citations seem to be wrong. Please correct them. For examples, Solitary fibrous tumor (SFT) is a rare type of fibroblastic mesenchymal neoplasm that affects spindle cell soft tissues, demonstrating broad-spectrum biological behavior; it is ordinarily benign, and rarely known to metastasize [1,2,3,4,5,6,7]. -> [1-7].

-----We corrected them.

4. In history of past illness, what was the correct diagnosis of his brain tumor? Was there any relation with present brain lesions? Please clarify.

----- The correct diagnosis of his brain tumor in history of past illness revealed to be SFT, and the unremovable tumor, namely present brain lesions enlarged and metastasized to the chest wall. We corrected the sentence.

5. Plain head or chest CT -> Unenhanced or non-enhanced CT.

-----We corrected them.

6. In discussion, it seems to be redundant. Please concise it.

-----We reviewed the discussion section and reduced the contents.

(1) Science Editor: (2) Summary of the Peer-Review Report: The references citations seem to be wrong, need to correct them.

-----We corrected them.

Author need to clarify in history of past illness the relationship between the correct diagnosis of brain tumor with present brain lesions.

----- The correct diagnosis of his brain tumor in history of past illness revealed to be SFT, and the unremovable tumor, namely present brain lesions enlarged and metastasized to the chest wall. We corrected the sentence.

5 Issues raised: I found the authors did not provide the original figures. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor.

-----Do you mean figures without any arrows? We provided them.
