25<sup>th</sup> July 2020

To whom it may concern

**Title of the study:** Nimbolide inhibits tumor growth by restoring hepatic tight junction protein expression and reduced inflammation in an experimental hepatocarcinogenesis

This is to certify that the statistical methods applied in this study were one-way ANOVA followed by Turkey's multiple comparison post-hoc test, which were primarily analysed using GraphPad Prism 6.0 software. One of our statisticians crosschecked and verified the same.
