**Stereotactic body radiation therapy (SBRT): a good dance partner of oligometastatic non-small cell lung cancer to the sound of SINDAS study**

SBRT for NSCLC: SINDAS study analysis

### Abstract

The European Organization for Research on Treatment of Cancer Research (EORTC) published a consensus statement to establish the key criteria to define oligometastatic disease (OMD). According to those criteria, all lesions (both primary and metastatic) should be amenable to radical intent treatment with acceptable toxicity. Several retrospective studies have shown that adding LAT to the treatment of OMD improves outcomes; however, due to the diverse selection criteria and treatment strategies used in these studies, it is difficult to directly compare results to draw definitive conclusions. In
