SPECIFIC COMMENTS TO AUTHORS

Name of Journal: World Journal of Clinical Cases Manuscript NO: 58700 Title: Primary and secondary postoperative hemorrhage in pediatric tonsillectomy It is an interesting study, however, the manuscript would benefit from the following changes/corrections:

1. The introduction is inadequate. The authors should give the prevalence of recurrent acute tonsillitis in the study population; its etiology and outcome.
2. The authors may like to give some estimates on the prevalence of tonsillectomy in China.
3. Results: It would be worthwhile to present the results in various sections with subheadings.
4. The authors may like to elaborate the use of variable like 'Monthly mean air temperature, and timing of surgery.'
5. Basic demographic details of subjects like origin, ethnicity, family history etc. need to be presented.
6. The primary presentation of the patients and associated complications, if any, should be mentioned.

SPECIFIC COMMENTS TO AUTHORS

The article with the title “Primary and secondary postoperative hemorrhage in pediatric tonsillectomy” is in generally well done, but I would offer these comments to the investigators: 1) Several words throughout the manuscript appear to be merged. Please correct it. 2) Some minor grammatical errors occur. The manuscript contains significant language-related issues. Please correct these types of grammatical errors throughout the paper. 3) Page 7: Please correct “...diagnosis, timing...” with “...and timing...” 4) Page 8. Please correct “hemorrhage” with “haemorrhage” 5) Page 12. There are two “the” “....or suturing of the the tonsil pillars...”. Please revise.
